OPERATION ID

HOW TO ENROLL IN THE PROGRAM

- Mark each item with your PIN number. Your PIN number is your driver's license or state ID number. Electric engravers are available at hardware stores.
- Record the description, including any serial and model numbers on the inventory sheet provided.
- Store your inventory sheet in a safe place. You may want to attach pictures with it.
- Display Operation ID stickers on front and back house windows to tell would be burglars that your property is easily identifiable and difficult to dispose of.

Operation ID is used both as a deterrent to crime and as a way of returning recovered property back to its rightful owner. As a member, your property will be less desirable to a thief because it is harder to sell and can be traced.

A thief may see your Operation ID stickers in your window and move on to the next target. In addition, if your property is recovered after being lost or stolen, it can be traced and returned to you.
